The above amendments were made in accordance with the practice set forth in M.P.E.P. section 1302.04 to correct informalities noted in the subject application by the Examiner.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is an examiner's statement of reasons for allowance: The claims are considered to patentably define over the prior art of record because the prior art fails to disclose an execution means for forming a predetermined toner image and detecting the density of the predetermined toner image before commencement of a normal image formation after an exchange of developer, as recited in base claim 29, for example.
